# Install jEdit plugin "FTP"

Step 0: install and start jEdit

- The Jedit is already installed in the PCs in the lab.
- Go to Start -> All programs -> jEdit ->jEdit
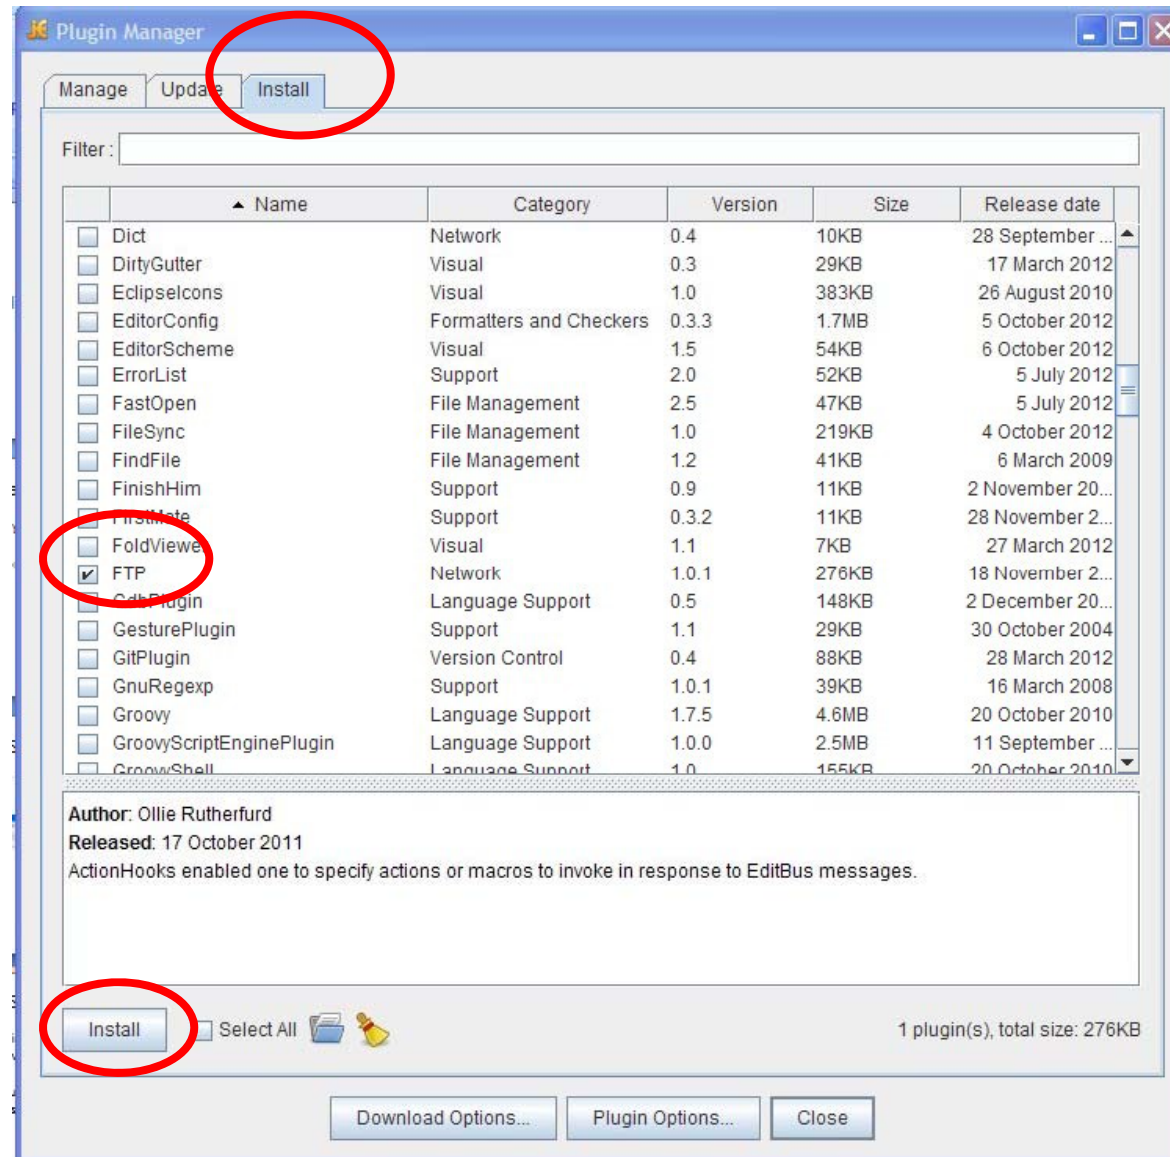

Step 1

- Choose Plugins -> Plugin Manager.

Step 2

- Click on the tab ``install'', wait for a few seconds, and you will see all the plugins that you can install.
- Find the ``FTP'' plugin, click the box in front of it and click on ``Install''.
 - Please see the figure in the next page.

Step 2

Step 3

- Go to the user interface of jEdit. Choose plugin -> FTP -> Open from secure FTP server.

Step 4

- Connect to secure FTP server.

Step 4

- Remote host:
  - The FTP server, e.g. sunfire.comp.nus.edu.sg
- User name and your password.
- Private key:
  - Leave it blank.
- Later there will be a warning, please choose "yes".
